It should take 8 hours for this process on the first charge.

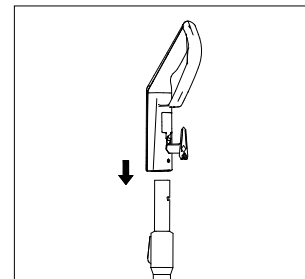

## Assembling ready for use

- 1. Identify the components required.**  
Take the main body and the two part handle out of the box.

- 2. Attach telescopic part of handle.**  
Slide the bottom end of telescopic handle onto the main body until it clicks into place. After connecting, please pull tightly to ensure the handle is securely locked in place.

- 3. Install batteries and fit top part of handle.**  
Open the battery cover in the back part of handle and insert the two AAA, 1.5v batteries. Replace the battery cover.  
  
Connect the handle to the telescopic handle, until it clicks into place. After connecting, please pull tightly to ensure the handle is securely locked in place.

## How to operate

### 1. Make sure the pads are clean.

Twist and wring out any excess water.

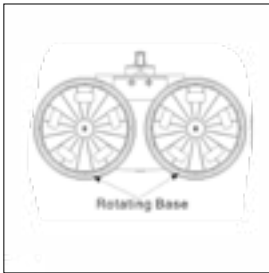

### 5. Clear the floor of debris and foreign objects.

We suggested a quick vacuum before cleaning.

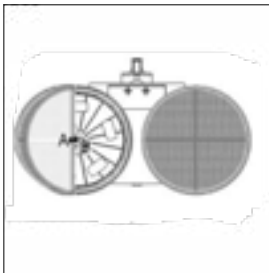

### 2. Fix the pads to the rotating base.

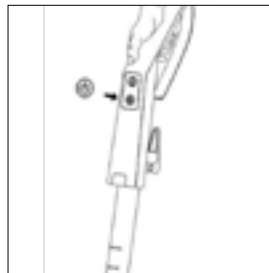

### 6. Step on the switch to power the rotating bases in the head unit.

### 3. Ensure the pads are located centrally on each base. Press pads firmly onto the rotating bases.

### 7. Press the power button on the handle to power the sprayer. Ensure you have fitted batteries.

### 4. Fill the spray container with water.

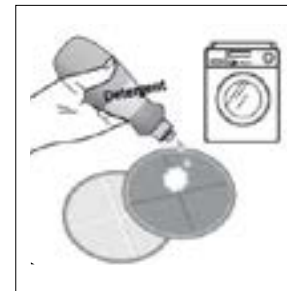

### 8. When required, press the spray button on the handle.

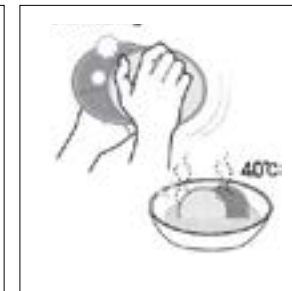

Always ensure the pads are located centrally on each rotating base.

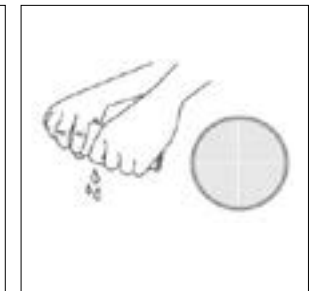

## Caring for your cleaning pads - washing

When machine washing apply a little detergent to each pad directly.

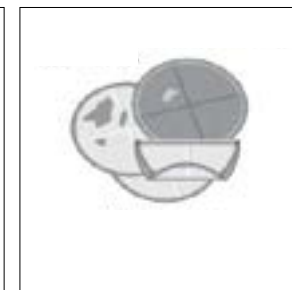

When hand washing, use two pads to scrub them clean.

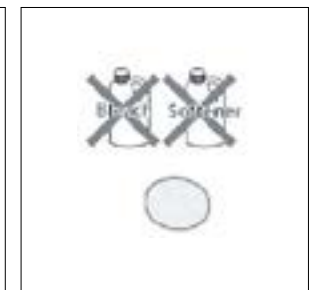

Twist and wring out any excess water.

Remove all debris from the pads to avoid damage to the floor when cleaning.

Wash separately from other items..

Never use bleach or fabric softener on the pads.

## Caring for your cleaning pads - washing

### Problem

### Possible fault/solution

The Floor Polisher/washer won't start?

- Please ensure whether the product has been sufficiently charged.
- Please ensure the batteries in the handle have been installed correctly and they haven't discharged.
- Please ensure the normal running time of 20 minutes hasn't been exceeded.

Excessive water is left on the floor.

Please ensure the pads are not full of soaked up water.

Excessive vibrations in the head of the unit.

Please ensure that the pads have been installed centrally on the rotating heads.

There is an unusual noise when cleaning.

- The unit will emit a the light "buzzing" sound. This is normal.
- Other noising could be caused by foreign objects attached to the cleaning pads.

## Technical Data
